

T-BOSIET DD

Tropical Basic Offshore Safety Induction & Emergency
Training Digital Delivery

This course is developed to introduce learners to the specific safety issues and regimes relevant to offshore installations, and to equip them with the basic emergency response knowledge and skills for travelling to and from offshore installations by helicopters in tropical environments.

T-BOSIET can be taken in conjunction with Travel Safely by Boat (TSbB), Rebreather Emergency Breathing System (EBS) & Shallow Water Compressed Air Emergency Breathing Systems (CA-EBS), but only through standard delivery, otherwise the additional subjects must be taken independently.

General Course Objectives

The objectives of the T-BOSIET are that learners will be able to:

- Identify the generic hazards that are specific to offshore oil and gas installations, potential risks associated with those hazards, and how controls are put in place to eliminate or reduce risks.
- Identify key offshore related safety regulations and explain the basic safety management concepts.
- Demonstrate that they can use the safety equipment, and follow procedures in preparing for, and during helicopter emergencies with particular focus on escaping from a helicopter following ditching.
- Demonstrate sea survival and first aid techniques.
- Demonstrate that they can effectively use basic fire fighting equipment, and practise self-rescue techniques in low visibility situations, to include smoke filled areas.

Course Content

- Safety Induction
- Fire Fighting & Self Rescue
- Sea Survival & Lifeboat (TEMPSC) training
- First Aid & Hypothermia
- Helicopter Safety Procedures & Helicopter Underwater Escape Training (HUET)
